Our Solutions

About Us

Incorporated in August 1998, Gigantika objective was to create a strong presence in the Indonesia's IT industry in system integration and network services. Capitalising our experience in system and network integration, we have transformed into full-fledged IT products distribution company in 2001 with KVM, and Networking products as our main focus. Around a decade later, Gigantika Pratama Prima has grown significantly with Professional A/V portfolio providing solutions for command center, control room, broadcasting and conference room solutions.

Industrial Data Communication & Networking Infrastructure

We provide Industrial Data Communication (IDC) solution focusing in vertical markets such as intelligent transportation system, railway, oil & gas, water/wastewater treatment, building automation, data centre and general industry.

Control Room/Command Center

Control rooms are an essential component of many industries. Whether it's for monitoring, decision-making, responding, controlling, collaborating or communicating, our control room solutions bring the future of control rooms closer– redefining control rooms for efficient work and better decision-making.

Conference Room

Conference room technology should make collaboration easier, not more complicated.

We offer a number of conference room solutions that will help your team turn every meeting into a productive endeavor.

Data Center Infrastructure Management

DCIM has been accepted as one of the most important issues in data center management. This integrated management helps to manage and monitor servers, switches, routers, energy PDUs and generic IP devices effectively.

Surveillance

End-to-End Surveillance Solutions - Customize your indoor and outdoor surveillance network with our high-quality IP cameras, PoE switches, simple-to-use NVRs and video Management Software(VMS).
